

PALLY PACKAGE BENEFITS

The Pally Package is a powerful software combination that offers a wide range of benefits to both the reseller of the Pally Package (UR Distributor or System Integrator) and the end customers.

By building your Palletizing Solution around The Pally Package, you can provide your customers with the most advanced and user-friendly UR Palletizing Solution available. It's a wise choice for your business and an excellent option for your customers.

MYROBOT.CLOUD

One of a kind Palletizing Robot Management System. These are some of the benefits you will experience:

- More efficient sales process.
- Verify customer projects in 1 hour, using a Digital twin of your palletizing solution. Save valuable time in your sales process.
- Digitally engineer the best possible solution for your customer.
- Store all your customer information and a digital twin of their exact solution.
- Generate palletizing patterns that can be directly imported into the robot. Each product and layer are customizable.
- Download the robot as STL.
- Download installation and URP.
- Reduce complexity from contact to support.
- Collaborate with your entire sales and engineering team.

MYROBOT.CLOUD FAST TRACK

- Connect with verified customers who have projects that match your expertise.

Test for yourself:
